Offering laser procedures & services to rejuvenate & refresh with less downtime, pain, & cost than surgical treatments. Many can buy paint at an art store or syringes of soft tissue fillers and botulinum toxin. But not anyone can create meaningful art or fade wrinkles, artistically volumize and restore the youthful contours of your face. Dr. Nalluri, with his award winning hands, personally performs your procedures using scientific understanding of the products and an extensive knowledge and experience of facial anatomy. Sure other spas may use injectors who’ve watched videos, taken a weekend course or have the bare minimum licensure requirements or take shortcuts to offer reduced prices, but we believe you get what you pay for. As with all procedures, results vary and are not guaranteed. You are encouraged to consult with the plastic surgeon and review the sample results as well as discuss potential complications and alternatives. Prices may vary based on your individual anatomy. Provided by Board Certified, top rated (by Castle Connolly, U.S. News and World Report and as featured in Cosmopolitan Magazine) Plastic Surgeon Raja Nalluri, M.D., you can expect safe and effective treatments.

**INJECTABLES**

**Restylane-Juvederm-Voluma**
Using a combination of hyaluronic acid soft tissue fillers (acids that naturally occur in our bodies, not artificial silicone), Dr. Nalluri accesses the superficial and deeper planes of your face to gently volumize and lift your cheeks, nasolabial folds, lips and other areas. $750 and up.

**BOTOX Cosmetic**
Purified onabotulinumA toxin is utilized to weaken the delicate muscles in our facial anatomy that make us look angry by reducing frown lines, crow’s feet and brow malposition. Migraine sufferers and night teeth-grinders also benefit. Many patients are not aware that this substance once constituted is maximally effective for just four hours. Many clinics prepare a vial and use it all day or for multiple days (which greatly weakens the effectiveness of the product) to reduce cost. Every one of our patients has a brand-new vial individually opened and constituted just for them. While many clinics offer you the bare minimum effective dose, here you are given an optimized amount based on medical studies to be more effective and longer lasting. We believe you get what you pay for. $600-$1000 every 3-6 months.

**Sculptra**
Skillful injection of Sculptra induces a stimulation of the collagen fibers beneath your skin in the deeper planes of the face which helps improve and restore the texture of your skin to a more youthful time. Recommended package: $3000 initial procedure and $1000 annual maintenance.

**LASERS**

**Laser-Resurfacing Facial**
Ablative erbium laser resurfacing for a light ($500) to moderate ($1500) laser peel rejuvenates skin surface to fade signs of aging.
